- Delivery Options
 - Flatbed
 - Container

RFQ PROCESS

ALL WE NEED TO START IS
YOUR SPECIFICATION WITH:

1. Pole Height
2. Pole Quantity
3. Fixture Specs (EPA, Weight, Bolt Pattern)
4. Fixture Quantity per Pole
5. Project Location
6. Geo-tech Report (optional)

1. Receive Project Details
2. Work through Engineering Specifications
3. Preliminary Drawings Created
4. Quotation Created

Our Promise

- Fast turnaround on quotes – available within 48–72 hours
- Value Proposition: advanced engineering and manufacturing, competitive pricing, expedited lead times, U.S.-grade quality steel, and proactive customer service you can count on.
- Complete shop drawings, pole calculations, and load criteria provided for review after award
- Shop drawings and foundation designs (U.S. projects) submitted for approval with Professional Engineering stamped (if required).
- Anchor bolt cages can be supplied in advance via a domestic vendor or shipped with the poles
- Pole manufacturing completed in as little as 3–5 weeks (shipping times vary by location).

Delivery Options (EXW, FOB, CIF, DAP, DDP US).

Beijing Daxing International Airport

Small Wind Poles successfully installed on North & South Poles
